# HOSHIZAKI

## BACK BAR REFRIGERATION SERIES

### SUPERIOR REFRIGERATION PERFORMANCE

HOSHIZAKI's Back Bar Refrigeration features side mount refrigeration that distributes air from left to right rather than from back to front. Side-to-side circular air flow ensures ice-cold products even when doors are opened regularly. The drain pan allows for efficient condensation management.

### OTHER FEATURES:

- ▶ Cabinets are designed to maintain interior temperatures between 33°F to 38°F
- ▶ Engineered to maintain NSF-7 temperatures in 100°F ambient
- ▶ Electronic controller with digital LED display (°F or °C)
- ▶ DD models come with keg cushion to protect floor and allow air to circulate below kegs

CC models include adjustable gray epoxy coated bin dividers, interior floor drain, removable bottle opener, and cap catcher.

Keg Cushion  
(DD models)

#### Note:

- Default temperature set-point for all models is 32°F
- Compressor cycles on at 38°F (+6°C) and cycles off at 32°F
- Automatic off-cycle defrost every 6 hours after energized
- There is a slight delay after models are energized before refrigeration system begins to work

## BACK BAR REFRIGERATION SERIES

### DURABLE, SUSTAINABLE CONSTRUCTION

HOSHIZAKI's Back Bar Refrigeration features stainless steel interior with LED lights, stylish wear-resistant black vinyl coated exterior front, sides and rear, as well as 18 gauge stainless steel top for excellent durability.

### OTHER FEATURES:

- ▶ Self-closing doors come standard with barrel locks
- ▶ Energy efficient, Low-E multi-pane glass doors
- ▶ Stainless steel threshold on DD models protects door frame when loading and unloading cabinet
- ▶ Cabinet walls and doors are insulated with 2" environmentally friendly, foamed-in-place polyurethane
- ▶ CC durable stainless steel slide top lids include locks and can be easily removed for loading or unloading product

DD polished stainless-steel insulated towers with plated brass faucet

*Note:*

*Cabinets are not designed to move on casters when loaded with product. Can be used to move cabinet out for cleaning only.*

## BACK BAR REFRIGERATION SERIES

### SIMPLE OPERATION AND MAINTENANCE

HOSHIZAKI's Back Bar Refrigeration features an internal capacity to merchandise 3 levels of tall boys (24 oz) for maximum product storage. Field interchangeable self-closing doors (glass or solid) with 90° stay open system for convenient loading. Locks standard per section.

### OTHER FEATURES:

- ▶ Front breathing, side mount refrigeration is easily accessible by sliding out for cleaning and service
- ▶ Zero clearance requirements – sides and rear
- ▶ BB models include 2 gray epoxy coated shelves per section with product stops

### TIPS FOR DISPENSING BEER

- Draught beer is best served between 38°-40° F
- Kegs should be chilled prior to placement in a direct draw refrigerator
- Although tower is insulated, condensation on the tower is normal
- It takes about 1 lb. of CO2 to dispense a 1/2 barrel of beer (keg)
- Beer is dispensed from the bottom of the keg
- Keg cushions protect the floor while allowing effective air flow for consistent temperatures
